

Ordering Master or Customer Ingredients

- 1) Go to **Tools** → **Customize** → and click on the **Ingredient Maintenance** tab.

Click on the drop down tab to change the sort levels.

The choice for order is within this list of options.

When using the **Ingredient Code** for sorting, it is sorted as an alpha-numeric string value. Therefore, if you were to sort numbers 1-20, it would be like this:
1, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 2, 20, 3 etc.

To avoid this, you can use the **User Defined Code**. User Defined will use the number set within the **ORDER** column of the **Ingredient Description** tab of the **Master Ingredients**.
